Integration with SAP S/4HANA

## A Modern SAP ArchiveLink Solution for Box

**docuflow & Box are the modern alternative to legacy systems for SAP content & process automation.**

docuflow® is an SAP-certified solution that uses SAP ArchiveLink standards for early and late archiving of content and metadata between SAP ERP and Box. Different from all the rest, docuflow has built-in no-code or low-code content automation tools, migration utilities and pre-built business solutions such as Accounts Payable, Audit Automation, and more.

Organizations running SAP can use Box and docuflow to modernize how they integrate and automate content.

## Overview

docuflow is a content integration and automation platform which bi-directionally manages content & metadata between SAP & Box.

### CORE CAPABILITIES:

With docuflow, teams can attach and view content both inside and outside of SAP and Box.

The solution is SAP-certified meaning it meets all the base-level ArchiveLink capabilities.

However, docuflow extends SAP ArchiveLink providing unique automation features and advanced solutions within SAP such as Virtual Linking, bi-directional metadata transfer and advanced DMS/DIR management.

This powerful capability is configured and easily maintained with the docuflow Administrator Workbench.

### BENEFITS AND VALUE

docuflow reduces costs & and increases your efficiency with seamless SAP archiving, linking & and process automation.

#### Drive Efficiencies

From automation of manual time-consuming tasks to triggering workflow processes, docuflow's intelligent "do-anything" automation capabilities drive efficiency and streamline your business inside and outside SAP.

#### Boost Productivity

Enable greater productivity by having business content securely at your fingertips with docuflow enhanced attachment management screens within SAP.

#### Easier & Faster Migrations

Built-in migration & and re-linking tools will get you to the cloud quickly, with no impact on your SAP users.

#### Lower Implementation Costs

Designed for the cloud & and speed to implementation, docuflow leverages your existing infrastructure and licenses and requires minimal services to implement saving you time and money.

#### The docuflow story

docuflow was founded 15 years ago by a team of seasoned SAP & ECM developers. Tired of building the same customizations over and over, the team used their diverse SAP skill sets to build what is now docuflow, an intelligent content and process integration engine.
