

Services Group

Advanced Content Integration & Automation Solutions for Box

VersaFile serves large organizations globally with content integration and automation solutions that save time and cost.

Overview

VersaFile delivers advanced content, integration, and process automation solutions built for enterprise-class scale and sophistication. Our services teams are deeply experienced technicians and consultants covering advanced content migrations, to program strategy and advisory.

Combined with our software products, we help enterprise-sized organizations with programs to modernize legacy content systems and automate their tasks and processes. Our purpose is to continuously add business value and ROI year after year.

"If all our partners were as awesome as VersaFile we would get a lot more done! In every sense, the people at VersaFile are absolute rock stars."

Al Ling, Director of Business Applications & ERP Support at Ole Miss

The VersaFile Services Group story

Founded 15 years ago by seasoned SAP & ECM developers, the group created two divisions, the Product Group which focused on commercializing docuflow, and the Services Group, which focused on growing the VersaFile consulting practice to help customers modernize legacy solutions & automate business processes and tasks.
